### EXPLORING BIOGEOCHEMICAL CYCLES

**DIRECTIONS:** Choose one of the five biogeochemical cycles to research: water; carbon; nitrogen; phosphorus; or oxygen. Then, complete the graphic organizer below.

Name of cycle: \_\_\_\_\_

Details of Cycle (3)	Picture of Cycle
Important Vocabulary (3 terms/definitions)	Human Impact on Cycle

Based on your biogeochemical cycle, how is the balance of the elements/compounds important to sustaining the environment?
